EDUCATION

PROFESSIONAL SUMMARY

Senior Principal FinOps with 12+ years of IT experience who has delivered \$9.4M in total annualized cloud savings across AWS and Azure — logging 72 optimization actions across FY2024 (\$5.4M) and FY2025 (\$3.9M) through strategic optimization drives and automation of manual cost management tasks. Currently leading enterprise cloud financial governance at PTC Inc. across AWS and Azure — combining deep technical expertise in cloud infrastructure, database engineering, and migrations with executive-level stakeholder communication. Certified AWS Solutions Architect, Azure Database Administrator, and FinOps Practitioner.

PROFESSIONAL EXPERIENCE

Senior Principal FinOps

PTC Inc. | Dec 2023 – Present

- ▶ Lead enterprise-wide cloud Optimization and governance across AWS and Azure, delivering \$9.4M in annualized savings across FY2024–FY2025 through 72 logged optimization actions spanning rightsizing, Reserved Instances, and automated cost controls.
- ▶ Drive Reserved Instance and Savings Plan strategy across AWS and Azure — as part of a multi-year rate optimization roadmap.
- ▶ Own FinOps reporting to C-suite — producing KPI dashboards, cloud spend trend analysis, and anomaly alerts that enable data-driven decisions at executive level.
- ▶ Embed cost optimization into engineering architecture reviews, influencing design-phase decisions before spend is committed — avoiding cost overruns before they occur.
- ▶ Developed automation to eliminate manual cost management tasks, significantly reducing team effort and accelerating remediation cycles across cloud environments.
- ▶ Champion cross-functional collaboration between Engineering, Finance, and Procurement to align cloud spend with business objectives.

Assistant Manager — Cloud FinOps

Allstate Solutions Pvt. Ltd. | Feb 2020 – Nov 2023

- ▶ Built a real-time cloud spending dashboard providing instant multi-cloud visibility, enabling proactive cost control — contributing to \$5M in cloud savings in 2023.
- ▶ Implemented a cloud cost allocation model that significantly improved chargeback accuracy and financial reporting across business units.
- ▶ Automated cloud cost optimization workflows, eliminating manual data gathering and manipulation tasks to reduce team effort and accelerate remediation cycles.
- ▶ Analyzed historical and projected cloud consumption to develop actionable optimization plans, sustaining long-term cost reduction across AWS and Azure.
- ▶ Delivered FinOps presentations to leadership, translating complex cloud economics into business-relevant insights and securing stakeholder buy-in for optimization initiatives.

Senior Engineer — Cloud Database Administrator

HumaneBITS Pvt. Ltd. | Jan 2017 – Jan 2020

- ▶ Led zero-downtime migration of on-premises applications to AWS including web/app servers, databases, and load balancers.
- ▶ Architected EC2 environments for high availability — configuring VPC, IAM, S3, CloudFront, Route 53, and Auto Scaling.
- ▶ Implemented CloudWatch alarms and auto-scaling policies, maintaining 24/7 application availability.
- ▶ Optimized data management pipelines using AWS DMS, Athena, and Redshift for analytics workloads.

Senior Engineer — Database Consultant

Technosoft Corporation | Nov 2016 – Jan 2017

- ▶ Delivered SQL Server consulting: performance tuning, index management, backup/recovery, and disaster recovery planning.

SQL DBA Consultant

System Plus Pvt. Ltd. | *Sept 2014 – Nov 2016*

- ▶ Managed SQL Server HA/DR (AlwaysOn, Clustering, Mirroring, Log Shipping) for multiple clients; supported data center migrations.

Senior DBA Implementer | Database Implementer

Neterson Technologies | Cnergyis InfoTech | *Dec 2010 – Sept 2014*

- ▶ Built foundational IT career implementing and supporting SQL Server databases across enterprise clients — database administration, high availability, and incident management.

KEY ACHIEVEMENTS

- ▶ \$9.4M in total annualized cloud savings across AWS & Azure (FY2024–FY2025) — \$5.4M in FY2024 (AWS \$4.5M + Azure \$0.9M) and \$3.9M in FY2025 (AWS \$0.7M + Azure \$3.2M) — across 72 optimization actions logged.
- ▶ Deployed automation to eliminate manual cost management tasks across AWS and Azure, reducing team effort and accelerating monthly optimization cycles.
- ▶ Built real-time FinOps dashboards adopted as the standard cost visibility tool across multiple business units at Allstate.
- ▶ Led multiple on-prem to AWS migrations with zero downtime, transitioning production web, app, and database workloads.
